Professional Video Projectors

...self adjustable projectors
make your life easier !

› Auto source recognition

› Automatic settings

› Anti-theft features

› WiFi connection

› Multimedia functions

Sagemcom

GENERAL CARACTERISTICS

Tri LCD technology and brightness

Thanks to this technology, you will find sensational and true colours which will sublimate your presentations and give brightness and luminosity whatever documents are presented.
In a badly lit meeting room or during a presentation under bright projectors, you will find among our various video projectors, the ideal luminosity which can reach up to 3500 lumens and high resolution XGA.

Extreme simplicity of use

On the principle of Plug and Play, everything was done to make it easy to use ; auto search detection, automatic keystone setting (perfect geometry of the image) and adaptation to format of projection method (ceiling mounted...).
Finally, no more endless waiting during the switch on/off period of the video with the automatic switch function.

Interactive meetings

With the WiFi option, switch from a PC to another with ease ! No more cable mess or exchanges and no more lost time !
Revitalize your presentations and highlight the key points by means of a laser pointer.
Enter the era of multimedia ! Each of the proposed models has an 8W integrated loud speaker. You can also show a logo of your choice during the connection of the device: an ideal way of receiving a customer or a partner!

Maximum security

When turning the VP on, choose a PIN code of your own or set up your metal lock (Kensington like). Thus you'll benefit from your projector for all its life.
