

# Anker Nebula Solar Portable

The Nebula Solar Portable LED DLP has 400 Ansi-Lumen and a HDTV 1920 x 1080 resolution. Thanks to the LEDs, the projector has a light life of up to 30,000 hours, which is over 20.5 years with a daily viewing time of 4 hours. The projector is equipped with an integrated media player, so direct playback of files will not be a problem. A built-in horizontal and vertical keystone correction provides freedom when positioning the projector. Thanks to the brightness of 400 Ansi lumens, a picture width of 203 cm is possible. In room light, the image should be max. 135 cm wide. Thanks to the built-in 20000 mAh battery, no power supply is required, allowing the projector to be set up quickly and flexibly. Another extra is that the Bluetooth function allows the projector to be connected to external wireless speakers. The model is also Full HD 1080P compatible. The projector is very quiet compared to others with an operating noise of 30 decibels. On the market since 2020, the model is no longer offered by the manufacturer Anker, but is still very popular in our projector database.

1 x 0,23" DMD DLP Chip  
HDTV 16/9 Ti Digital Light Processing Chip
