

Digital Projection TITAN 1080p 660 Ultra Contrast

Brief Introduction

Beta 2.5

The Digital Projection model TITAN 1080p 660 Ultra Contrast is a DLP projector with HDTV 1920 x 1080 resolution and a contrast of 5000:1. The integrated lens shift gives freedom when positioning the projector. The projector can illuminate a picture width of 718 cm well. Rooms with residual light can be created by the projector with a smaller image width, we recommend a maximum of 479 cm. If the image width is not sufficient, the projector offers integrated edge blending software, which allows several projectors to project a large image together. The model is also Full HD 1080P and 3D compatible. This model is no longer offered by Digital Projection, but is still a popular projector in our database.
