The Digital Projection model TITAN WUXGA Quad 3D is a DLP projector with WUXGA 1920 x 1200 resolution and a contrast of 2000:1. The projector also offers a lens shift function, which makes setting up the image childs play. The projector can illuminate images up to 1285 cm wide thanks to its 16000 Ansi lumens. The projector can create rooms with residual light with a smaller image width, we recommend a maximum of 857 cm. If the image width is not sufficient, the projector offers integrated edge blending software, which allows several projectors to project a large image together. Playing 1080P and 3D is also no problem for the projector. It was launched in 2011 and is no longer offered by the manufacturer Digital Projection, but is still a popular projector in our database.
