

Dukane ImagePro 6710UL-B

DUKANE IMAGEPRO 6710UL-B

The large-screen ImagePro 6710UL-B 3D laser LCD projector from Dukane has 10000 Ansi lumens, a contrast of 3000000:1 and a WUXGA 1920 x 1200 resolution. Thanks to the laser, the service life is 20000 hours, which is over 13.7 years if enjoyed for four hours a day. With the lens shift function, the projector can be positioned very freely. Thanks to the brightness of 10000 Ansi lumens, a picture width of 1016 cm is possible. The projector can also handle slightly brighter rooms with a smaller picture width (we recommend max. 677 cm). In the event that the image is still too small, the projector offers integrated edge blending software, which allows several projectors to project a large image together. Video signals 1080P and 4K (compressed) as well as 3D are also no problem for the projector, meaning that all Blu-ray formats currently available can be recognized by the projector.
