

Eiki LC HDT700

EIKI LC HDT700

A brief introduction to the LC HDT700: The Eiki stationary LCD projector offers 7000 Ansi lumens, a contrast of 2700:1 and HDTV 1920 x 1080 resolution. The integrated lens shift gives you freedom when positioning the projector. 7000 Ansi lumens ensure that a picture width of 850 cm is also possible. The projector creates rooms with residual light with a smaller image width, we recommend a maximum of 567 cm. In the event that the image is still too small, the projector offers integrated edge blending software, which allows several projectors to project a large image together. Even 1080P video signals are no problem for the projector, and it even has the option of projecting HD 1080P Blu-rays onto the ceiling using 360° projection. The model built in 2011 is no longer offered by Eiki, but is still a popular projector in our database.
