

Epson EB-725W

EPSON EB-725W

The Epson EB-725W short-throw laser LCD projector has 4000 Ansi lumens, a contrast of 2500000:1 and a WXGA 1280 x 800 resolution. Thanks to the laser technology, the projector has a light life of up to 20000 hours, which is equivalent to over 13.7 years at 4 hours per day. The integrated media player can play files directly. The horizontal and vertical keystone correction allows the projector to be positioned very freely. With a projection ratio of just 0.28:1, this projector never gets in the way. For a 2m wide image, the projector only needs to be 56 cm away from the screen. The projector is equipped with a microphone jack plug and 16W speakers, so no additional speakers are required for presentations or training sessions. The projector has Miracast screen mirroring support, which enables direct playback of videos in high resolution and surround sound from smartphones, tablets and PCs with Android, Windows or iOS via Wi-Fi. Even 1080P and 4K (compressed) video signals are no problem for the projector. The projector was launched in 2021 and is no longer sold by the manufacturer, but is still a very popular projector.
