FINADE S106

A brief introduction to the finade S106. The LCD LED projector has an HDTV resolution of 1920 x 1080 and a contrast ratio of 10,000:1. The manufacturer, finade, specifies a lifespan of 30,000 hours, which would equate to over 20.5 years at 4 hours? use per day. The built-in media player can play files directly. Thanks to the horizontal and vertical keystone correction, the projector can be positioned with great flexibility. With its 260 ANSI lumens, the projector can effectively illuminate an image width of up to 144 cm. However, in room lighting conditions, the image width should ideally be less than 96 cm. The model recognises AirPlay and Miracast screen mirroring signals, so it is possible to play high-resolution videos with surround sound directly via Wi-Fi from a smartphone, tablet or PC (Android, Windows and iOS) via Wi-Fi. In addition, the Bluetooth capability is a useful addition to the projector, particularly for wireless audio transmission. The model is also compatible with Full HD 1080p and 4K (compressed). At just 25 decibels, the device is one of the quieter projectors available.
