

HALIMOMO H500

HALIMOMO H500

A brief introduction to the HALIMOMO H500. The portable game LCD LED projector has an HDTV 1920 x 1080 resolution and a contrast of 10000:1. The lifespan is 30,000 hours thanks to the LEDs, which is over 20.5 years at four hours of enjoyment per day. The projector can easily illuminate images up to 185 cm wide thanks to its 330 ANSI lumens. However, in a well-lit room, the image width should ideally be under 123 cm. Since the projector recognises Chromecast, screen mirroring signals, it is possible to play videos with high resolution and surround sound directly from a smartphone, tablet, PC (Android, Windows and iOS) via Wi-Fi. Another extra worth mentioning is the Bluetooth function, which allows the projector to be connected to external wireless speakers. The projector can also handle video signals 1080P and 4K (compressed). The low operating noise of just 27 decibels makes projection quiet.
