

Hisense P1

HISENSE P1

Brief Introduction

Beta 2.5

The Hisense P1 Laser DLP projector has 1,170 ANSI lumens, a contrast ratio of 30,000:1, and an HDTV resolution of 1920 x 1080. It is a laser projector with a light source lifespan of 30,000 hours, which equates to over 20.5 years of use at four hours per day. Horizontal and vertical keystone correction ensures effortless image setup. The projector can effectively illuminate an image width of up to 348 cm. However, in well-lit rooms, the image width should ideally not exceed 232 cm. Thanks to the built-in 20,000 mAh battery (2.5 hours of video, 5.2 hours of audio), no external power source is required, allowing for quick and flexible setup. Since the projector supports AirPlay and Miracast screen mirroring, you can stream high-resolution videos with surround sound directly from a smartphone, tablet, or PC (Android, Windows, and iOS) via Wi-Fi. In addition, Bluetooth connectivity is a useful feature for the projector, especially for wireless audio transmission. It is also compatible with Full HD 1080p and 4K (compressed).
