

InFocus INL2169

INFOCUS INL2169

The standard portable INL2169 3D Laser DLP projector from InFocus has 4500 ANSI lumens, a contrast ratio of 300000:1 and a WUXGA 1920 x 1200 resolution. The manufacturer specifies a laser lifetime of 30,000 hours, which equates to over 20.5 years of enjoyment at four hours per day. The horizontal and vertical keystone correction allows the projector to be positioned very freely. An image width of up to 682 cm is possible; if the image width is smaller (we recommend max. 455 cm), even rooms with residual light are no problem. Furthermore, the projector can play 1080P and 4K (compressed) as well as 3D without any problems, meaning that all currently available Blu-ray formats can be recognized by the projector. Compared to others, the projector is very quiet with an operating noise of 30 decibels.
