

iZEEKER iPL610

iZEEKER iPL610

A brief introduction to the iZEEKER iPL610. The LCD LED projector has an HDTV 1920 x 1080 resolution and 600 Ansi lumens. Thanks to the LEDs, the projector has a light life of up to 20000 hours, which is equivalent to over 13.7 years at 4 hours per day. The built-in ambient light sensor detects the ambient light in the room and automatically optimizes the picture. Includes an integrated media player that can be used to play files directly. Built-in horizontal and vertical keystone correction provides freedom when positioning the projector. An image width of up to 249 cm is possible. However, the image should be smaller in room light. We recommend max. 166 cm. As the projector recognizes screen mirroring signals, it is possible to play videos with a high resolution and surround sound directly from a smartphone, tablet, PC (Android, Windows and iOS) via WLAN. In addition, the Bluetooth option is a useful addition to the projector, especially for wireless audio transmission. Furthermore, the projector can play 1080P and 4K (compressed) without any problems. With only 29 decibels of operating noise, the model is already very quiet compared to others.

Brief Introduction

Display Type

1 x LCD TFT Panel
HDTV 16/9 Liquid Crystal Display

Ansi-Lumen

600 267 Lux (bei 200 cm Screen)
