Introducing the K3: the KJM LED LCD projector offers 1500 ANSI lumens and HDTV 1920 x 1080 resolution. The LEDs give the projector a lifespan of 30,000 hours of light, which is the equivalent of over 20.5 years at 4 hours a day. The integrated media player can play files directly. 1500 ANSI lumens ensure that an image width of 393 cm is also possible. However, if room lighting is present, the image should not exceed 262 cm in width. The model recognises Airplay and Miracast screen mirroring signals, making it possible to play videos with high resolution and surround sound directly from a smartphone, tablet or PC (Android, Windows and iOS) via Wi-Fi. Another useful feature is the Bluetooth function, which allows the projector to be connected to external wireless speakers. The projector can also play 1080P and 4K (compressed).
