A brief introduction to the Nec PA550W. The stationary LCD projector has a WXGA 1280 x 800 resolution and a contrast of 2000:1. Includes an integrated media player for direct file playback. Includes a lens shift and keystone correction function, which provides freedom during installation. 753 cm image width, the projector will be able to illuminate well. The projector can create rooms with residual light with a smaller image width, we would recommend a maximum of 502 cm here. Playing 1080P is also no problem for the projector. On the market since 2011, the model is no longer offered by the manufacturer Nec, but is still very popular in our projector database.
