

Optoma HD151X

OPTOMA HD151X

The Optoma model HD151X is a DLP projector with HDTV 1920 x 1080 resolution and a contrast of 28000:1. The projector also offers a lens shift function, which makes setting up the image child's play. As the HD151X is equipped with a microphone jack and 15W speakers, no additional audio system is required for presentations or training courses. An image width of up to 538 cm is possible as the projector has 2800 Ansi lumens. However, if room light is available, the image should be max. 359 cm wide. Playing 1080P and 3D is also no problem for the projector. The projector was launched in 2014 and is no longer sold by the manufacturer, but is still very popular in our projector database.
