OPTOMA HZ150X

Brief Introduction

Beta 2.5

The standard portable Optoma HZ150X 3D laser DLP projector has 5000 ANSI lumens, a contrast ratio of 2000000:1, and HDTV 1920 x 1080 resolution. Thanks to laser technology, the projector has a light life of up to 30,000 hours, which would be over 20.5 years if viewed for 4 hours a day. A built-in horizontal and vertical keystone correction provides freedom when setting up the projector. The brightness of 5000 ANSI lumens allows for an image width of 718 cm. The projector can also handle slightly brighter rooms with a smaller image width (we recommend a maximum of 479 cm). Playing 1080P and 3D is also no problem for the projector, which can even project Blu-rays onto the ceiling thanks to its 360° projection. At just 29 decibels, the device is one of the quieter projectors available.
