

Panasonic PT-CMZ50WU

PANASONIC PT-CMZ50WU

A brief introduction to the Panasonic PT-CMZ50WU. The LCD laser projector has a WUXGA 1920 x 1200 resolution and a contrast of 3000000:1. It is a laser projector with 20000 hours of light life, which is over 13.7 years if enjoyed for four hours a day. The projector also offers an integrated media player that can be used to play files directly. As the projector has horizontal and vertical keystone correction, the projector can be set up with plenty of free space in the room. Thanks to the short-throw projection ratio of just 0.235:1, the projector is also not distracting in the room. For a 2m wide image, the projector only needs to be 47 cm away from the screen. If the image width is not sufficient, the projector offers integrated edge blending software, which allows several projectors to project a large image together. The model is also compatible with Full HD 1080P and 4K (compressed) as well as 3D, meaning that all Blu-ray formats currently available can be recognized by the projector.
