

Panasonic PT RZ475E/U

PANASONIC PT RZ475E/U

The Panasonic model PT RZ475E/U is a DLP laser projector with HDTV 1920 x 1080 resolution and a contrast of 20000:1. Due to the laser, the projector is specified with 20000 hours of light life, which converts to over 13.7 years at 4 hours of use. Includes a lens shift and keystone correction function, which provides freedom during installation. 3000 Ansi lumens ensure that a picture width of 556 cm is also possible. However, if room light is available, the picture should be a maximum of 371 cm wide. In the event that the image is still too small, the projector offers integrated edge blending software, which allows several projectors to project a large image together. Playback of 1080P is also no problem for the projector, which can even project Blu-rays onto the ceiling thanks to 360° projection. The model built in 2013 is no longer offered by Panasonic.
