

Proxima M1010X

PROXIMA M1010X

The M1010X LCD has 6000 Ansi lumens, a contrast of 2000:1 and an XGA 1024 x 768 resolution. Including a lens shift and keystone correction function, which provides freedom during installation. Thanks to the brightness of 6000 Ansi lumens, an image width of 675 cm is possible. The projector can also handle slightly brighter rooms with a smaller image width (we recommend max. 450 cm). The model built in 2015 is no longer offered by Proxima.
