The standard portable Pyle PRJHD66 LCD projector has 108 Ansi lumens, a contrast of 800:1 and a VGA 640 x 480 resolution. The lamp life is specified by the manufacturer as 6000 hours, which converts to over 8.2 years at 2 hours per day. As Pyle specifies the brightness of the projector in lumens, we have calculated an approximate ansi-lumen value in this case. 91 cm image width the projector will be able to illuminate well. If room light is available, however, the picture width should ideally not exceed 61 cm. 1080P playback is also no problem for the projector. It was launched in 2011 and is no longer offered by the manufacturer Pyle.
