The game portable PRJLE33 LED LCD projector from Pyle has 150 Ansi lumens and an SVGA 800 x 600 resolution. The service life of the LEDs is 20000 hours, which is over 13.7 years if enjoyed for four hours a day. As Pyle specifies the brightness of the projector in lumens, we have calculated an approximate Ansi lumen value in this case. The projector can illuminate an image width of up to 107 cm well thanks to the 150 Ansi lumens. In room lighting, however, the picture width should ideally be less than 71 cm. Playing 1080P is also no problem for the projector. On the market since 2011, the model is no longer offered by the manufacturer Pyle.

1 x 5" LCD TFT Panel
SVGA 4/3 Liquid Crystal Display
