Data

A brief introduction to the Ray Display Ray. The LED projector has a VGA 640 x 480 resolution and 11 Ansi lumens. The service life of the LEDs is 20000 hours, which is over 13.7 years if enjoyed for four hours a day. The rechargeable projector is not dependent on a direct power source and can therefore be set up very quickly, freely and spontaneously. On the market since 2009, the model is no longer offered by the manufacturer Ray Displays.
