The Micro-Portable The Freestyle Plus LED DLP has 538 ANSI lumens and an HDTV 1920 x 1080 resolution. The LEDs have a service life of 30,000 hours, which equates to over 20.5 years at 4 hours per day. Since Samsung specifies the brightness of the projector in lumens, we have calculated an approximate ANSI lumen value in this case. The projector can illuminate up to 154 cm of image width with its 538 ANSI lumens. However, in room lighting, the image width should ideally be less than 103 cm. If the image is still too small, the integrated edge blending software can help to project a large image with additional projectors. The battery-powered projector does not require a direct power source and can therefore be set up very quickly, freely, and spontaneously. The model recognizes Airplay and Miracast screen mirroring signals, making it possible to play high-resolution videos with surround sound directly via Wi-Fi from a smartphone, tablet, or PC (Android, Windows, and iOS). In addition, thanks to the Bluetooth function, the projector can be flexibly paired with other speakers. It is also Full HD 1080P compatible. The operating noise of only 30 decibels makes the projection quiet.
