THOMSON SIRIUS PG55B

The Sirius PG55B Laser LCD has 600 ANSI lumens, a contrast ratio of 1000:1, and HDTV 1920 x 1080 resolution. It is a laser projector with a light life of 20,000 hours, which equates to over 13.7 years of enjoyment at four hours per day. Thanks to its short-throw projection ratio of just 0.19:1, the projector does not interfere with the room. For a 2m wide image, the projector only needs to be 38 cm away from the screen. The built-in 55.5Wh battery means that no power supply is required, allowing the projector to be set up quickly and flexibly. Google TV turns the projector into a versatile media hub that can be seamlessly integrated into a smart home. Since the projector recognizes Chromecast, Airplay, and Miracast screen mirroring signals, it is possible to play videos with high resolution and surround sound directly from a smartphone, tablet, or PC (Android, Windows, and iOS) via Wi-Fi. In addition, the Bluetooth capability is a useful addition to the projector, especially for wireless audio transmission. The model is also Full HD 1080P and 4K (compressed) compatible.
