The Thomson Vega PG35B LED LCD portable gaming projector has 350 ANSI lumens, a contrast ratio of 350:1, and HDTV 1920 x 1080 resolution. It is an LED projector with a light life of 30,000 hours, which equates to over 20.5 years of enjoyment at four hours per day. An image width of up to 190 cm is possible. However, in room lighting, the image should be smaller. We recommend a maximum of 127 cm. The built-in 33.48 Wh battery means that no power supply is required, allowing the projector to be set up quickly and flexibly. Google TV turns the projector into a versatile media hub that can be seamlessly integrated into a smart home. The model recognizes Airplay and Miracast screen mirroring signals, making it possible to play high-resolution videos with surround sound directly via Wi-Fi from a smartphone, tablet, or PC (Android, Windows, and iOS). In addition, the Bluetooth capability is a useful addition to the projector, especially for wireless audio transmission. Even 1080P and 4K (compressed) video signals are no problem for the projector.
