The V18 LED LCD has 300 ANSI lumens and an HDTV 1920 x 1080 resolution. The LEDs have a lifespan of 30,000 hours, which would be over 20.5 years if viewed for 4 hours a day. The projector can illuminate a 176 cm image width well. However, if there is room lighting, the image width should not exceed 117 cm. The projector has Airplay and Miracast screen mirroring support, which allows high-resolution videos and surround sound to be played directly from smartphones, tablets, and PCs running Android, Windows, or iOS via Wi-Fi. In addition, the Bluetooth capability is a useful addition to the projector, especially for wireless audio transmission. The projector can also play 1080P and 4K (compressed) content without any problems.
