The PX749-4K DLP projector from Viewsonic has 4000 Ansi lumens, a contrast of 12000:1 and a UHD (4K2K) 3840 x 2160 resolution. The lamp life is specified by the manufacturer as 20000 hours, which converts to over 27.4 years at 2 hours per day. As the projector has horizontal and vertical keystone correction, the projector can be set up with plenty of free space in the room. An image width of up to 643 cm is possible if the image width is smaller (we recommend max. 429 cm), rooms with residual light are also no problem. Furthermore, the projector can play 1080P and 4K without any problems.
