WOWee ONE VUE

WORKS WITH A VARIETY OF DEVICES

Made for iPod iPhone iPad

Compatibility

HDMI-Equipped Mobile Devices Full Video Mirroring

WOWee ONE VUE is compatable with number of mobile devices that provide HDMI connectivity and support video mirroring, makes it possible to project and share what's on the host display. What you see on the host mobile deviceyou can project!

+BlackBerry® PlayBook™ - under HDMI settings turn HDMI audio to offand set resolution to "Fill"
+Apple® iPad® 2 - requires Apple Digital AV Adapter (sold separately by Apple) and Micro-to-Standard HDMI cable (sold separately)
+Windows® 7 Tablet PCs+Windows® 7 Notebooks and Netbooks
+Nokia® Compatible Symbian SmartPhones – such as N8

Apple iDevices

WOWee ONE VUE is compatible with iPhone®, iPod® & iPad® via TV/Video-Out.

iPod devices provide a TV/Video-Out signal for picture slideshows and video content music videos, full-length movies, video podcasts, etc.
*Not sure what model iPod you have? Read the Apple Knowledge Base article about identifying iPod models.

Other HDMI-Equipped Devices

The WOWee ONE VUE is compatible with a host of devices that provide HDMI connectivity via a native HDMI port or MHL-to-HDMI adapter, and TV/Video -Out functionality (480p support required).

+Cameras and Camcorders
+Android™ SmartPhones – given the diversity in operating system implementations external or Bluetooth® speaker may be required to receive audio(headphone jack connectivity).
+Android Tablets (Honeycomb 3.x) – current implementations of the Android Honeycomb operating system limits video out to 720p and higher
The WOWee ONE VUE provides 480p video-out and as such is not currentlycompatible with these devices.

VGA-Out Capable Devices

Use the optional VGA connect adapter to project from any of the following devices
+Laptops
+Netbooks
+MacBook
+MacBook

SHOWWX+™ VGA DOCK (sold separately)
