

WUPRO Cinema G3

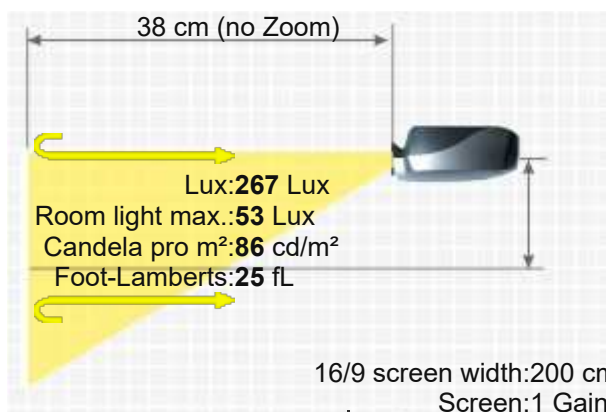

The short-throw G3 laser projector from WUPRO Cinema has 600 ANSI lumens, a contrast ratio of 1000:1, and an HDTV resolution of 1920 x 1080. Manufacturer WUPRO Cinema specifies a lifespan of 20,000 hours, which would equate to over 13.7 years at 4 hours of use per day. The built-in ambient light sensor detects the ambient light in the room and automatically optimizes the image. Since the projector features horizontal and vertical keystone correction, it can be set up with plenty of space in the room. With a throw ratio of just 0.19:1, this projector never gets in the way. For a 2-meter-wide image, the projector needs to be positioned just 38 cm away from the screen. Thanks to the built-in Android TV software, it offers direct access to a wide variety of streaming services such as Netflix, Disney+, Amazon Prime Video, and YouTube, as well as games and other interactive content. Google TV transforms the projector into a smart entertainment center with countless features. Since the projector supports AirPlay and Miracast screen mirroring, you can stream high-resolution videos with surround sound directly from a smartphone, tablet, PC (Android, Windows, and iOS) directly over Wi-Fi with high resolution and surround sound. Another notable feature is that the projector's Bluetooth function allows it to connect to external wireless speakers. Furthermore, the projector can play 1080p content without any issues.

Brief Introduction

Beta 2.5

Display Type

Ansi-Lumen	600	267 Lux (200 cm Screen width)
Contrast	1000:1	1000:1
