XGIMI Horizon

Brief Introduction
Beta 2.5

The Horizon LED DLP projector from XGIMI has 2200 Ansi lumens and an HDTV 1920 x 1080 resolution. The manufacturer specifies an LED service life of 30,000 hours, which equates to over 20.5 years at 4 hours of use. As the projector has horizontal and vertical keystone correction, the projector can be set up with plenty of free space in the room. Thanks to the brightness of 2200 Ansi lumens, a picture width of 477 cm is possible. With room lighting, the image should be max. 318 cm wide. Thanks to the integrated Android TV software, it offers direct access to a variety of streaming services such as Netflix, Disney+, Amazon Prime Video and YouTube as well as games and other interactive content. The integrated Google Assistant turns the projector into a hub in the smart home, combining voice control and a wide range of functions. The model recognizes Chromecast, screen mirroring signals, so it is possible to play videos with high resolution and surround sound directly via WLAN from a smartphone, tablet or PC (Android, Windows and iOS). Thanks to the Bluetooth function, the projector can also be flexibly paired with other speakers. Playing 1080P is also no problem for the projector. With an operating noise of just 30 decibels, the model is very quiet compared to others.
